

NORTH CAROLINA  
DEPARTMENT OF HUMAN RESOURCES  
INTER OFFICE MEMORANDUM

DATE 11/26/79

TO Bill Meyer

FROM Mike Bell

In accordance with our previous conversation, here is the only information which I have in my files regarding location of wells near the Brunswick County landfill. I do not have the well construction records.

BRUNSWICK G. WATER

Hood Building  
Southport, North Carolina 28461

RE: Brunswick County Water System  
Phase I

Dear Mr. Mallory:

Reference is made to our discussion of January 3, 1975 regarding the location of the water supply wells for Phase I of the Brunswick County Water System in the vicinity of the Sanitary Landfill presently being operated by Brunswick County.

This office has submitted previous correspondence to you approving the locations of the proposed wells. After a thorough investigation of this situation, which included consultation with the Ground Water Division of the Department of Natural and Economic Resources and the U. S. Geological Survey, it was the opinion of this office that the landfill would have no significant effect on the water quality in the nearby wells provided that the wells be located at least 900 feet from any portion of the Brunswick County sanitary landfill. Our approvals were issued with that stipulation and the potential for expansion of the existing landfill in the same area was considered in issuing the well site approvals. In reviewing the map which you presented to me showing the proposed area for expansion of the existing landfill, we feel that expansion of the landfill into this area would have no significant effect on the nearby water supply wells provided that the wells be kept at least 900 feet from any portion of the landfill. The map indicates that this distance requirement will not be violated.

Your interest and cooperation in this matter is appreciated. If you have any questions concerning this matter or if we can be

Mr. Neil Mallory

Mr. Edwin S. Clemmons  
Sanitary Landfill Director  
~~Brunswick Co.~~ Office of the County Manager  
P. O. Box 876 J + R  
Southport, North Carolina 28461

Dear Mr. Clemmons:

The plan for closing the cells at the Smithville Township landfill has been received. The plan is in accordance with our agreement and is approved by this office.

I am enclosing a copy of the chemical analysis of the water taken from the stream near the fill. As you can observe there is little if any difference in the water quality above and below the landfill so it would seem that we are not polluting the stream.

If this office can be of assistance, please let us know.

Sincerely,

O. W. Strickland, Supervisor

Re: Sanitary Landfill located  
on Weyerhaeuser Property  
Smithville Township, Brunswick  
County

Dear Mr. Smith:

Enclosed you will find plans for reshaping and seeding lower end of the landfill trenches submitted by Maynard Owens, District Conservationist. I am submitting the plans to the N. C. State Board of Health for their comments. I have reviewed the plans and found them to be acceptable to Brunswick County, however, the county wishes to incorporate into these plans to the extent of carrying out provisions as indicated in Section 3 - F & G of land use permit, upon that area utilized for landfill.

If you find the plans acceptable, please advise and Brunswick County will take corrective measures immediately upon your approval.

If you have any questions, please do not hesitate to contact this office.

Sincerely yours,

BEAVER DAM LANDFILL  
PLANS FOR RESHAPING AND SEEDING LOWER END OF THE LANDFILL TRENCHES

Clean out the silt and debris which has accumulated below the completed landfill trenches. Push or carry this material to an open landfill trench.

Clean out the brush, roots, etc. to the mineral soil.

With a bulldozer or other equipment, place clean mineral soil in the trenches and shape the slope to a 2:1 or flatter grade. At the top of the slope, construct a broadbased diversion so that any surface water will be diverted from the newly shaped slope.

Apply dolomitic limestone at the rate of 1 ton per acre and use a complete fertilizer such as 8-8-8 at the rate of 1000 pounds per acre.

Seed to Bermuda grass and ryegrass. If seeded before March 1, use 20 pounds unhulled bermuda grass and 15 pounds ryegrass per acre. If seeded after March 1, use 12 pounds of hulled bermuda grass and 15 pounds of ryegrass per acre.

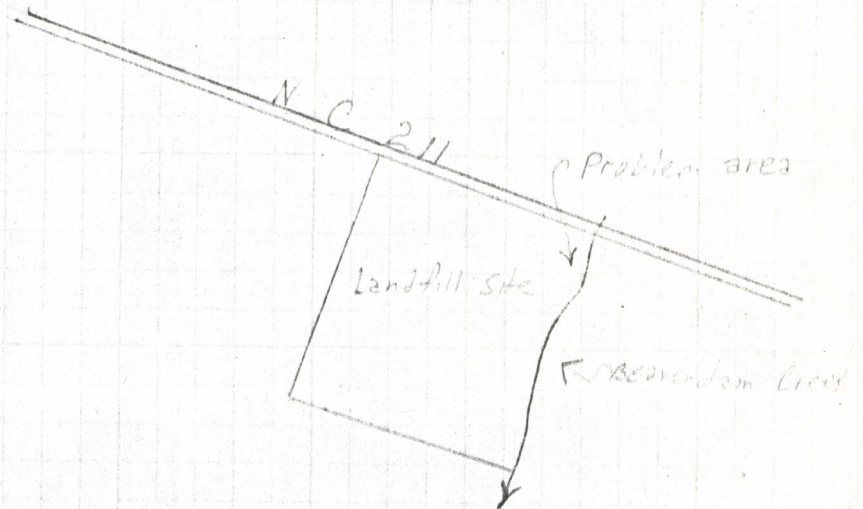

A typical profile and sketch is attached.

Dear Mr. Smith:

I have been in contact with Mr. O. W. Strickland with the State Board of Health along with Mr. Terry Dover, District Engineer, and Mr. Maynard Owen of the Brunswick Soil and Water Conservation District and I would like to meet with you Wednesday, January 16, 1974 at 11:00 A. M. for the purpose of defining what measures will be necessary to correct the existing situation at the referenced landfill.

If you have additional questions, please do not hesitate to call me.

Sincerely yours,
